Hello from IamResponding!

New features were released today!

We have released an AVL system (this is an open beta version of AVL) to track and map your apparatus on your IamResponding maps, and we have also added a Pre-Plan function that allows you to upload pre-plan documents and images in these file types: pdf, jpg, png, bmp.

Instructions on how to use these new functions are under the "Help" button on your main IamResponding screen!

Check them out!
